PROFESSIONAL SUMMARY

First-year Electronics and Instrumentation Engineering student at Kumaraguru College of Technology (KCT) with a strong interest in Embedded Systems, IoT, Renewable Energy, Automation, and Electrical Engineering. Hands-on experience through research initiatives, academic projects, and self-learning. Passionate about developing innovative and sustainable technology solutions and contributing to impactful engineering projects.

EDUCATION

B.E. Electronics and Instrumentation Engineering (EIE)

Kumaraguru College of Technology (KCT), Coimbatore

Expected: May 2029

EXPERIENCE

Engineering Intern – AICTE Internship Program

Dec 2025 – Present

- Gained hands-on exposure to core engineering concepts through structured, industry-aligned learning modules and practical lab activities.
- Collaborated with peers to analyze engineering problem statements, applying foundational embedded systems and automation knowledge.

Freelancer – Web Development, Mechanical Modeling & Electrical Projects

Dec 2025 – Present

- Executed client-facing projects across frontend web development, mechanical modeling, and basic electrical tasks.
- Delivered functional website solutions using HTML, CSS, JavaScript, and vibe coding techniques; demonstrated multidisciplinary adaptability.

Member – Shree Power Tech

Dec 2025 – Present

- Supported company profile development, technical documentation, and industry-oriented engineering activities alongside professionals.
- Gained insights into industrial workflows related to power and electrical systems.

Technical Volunteer & Event Coordinator – AICTE Idea Lab, KCT

Dec 2025 – Present

- Participated in hackathons and innovation events; coordinated engineering workshops promoting technical knowledge exchange and teamwork.
- Facilitated collaboration between students, faculty, and industry experts.

PROJECTS

Wireless Battery Monitoring System (Research Project)

- Investigating wireless communication techniques, cell balancing methods, and real-time battery monitoring.
- Exploring IoT-based wireless data acquisition systems for Battery Management Systems.

Solar Power Monitoring System (Concept)

- Conducted review study on solar PV systems, grid integration challenges, and Grid Enhancing Technologies (GETs).
- Analyzed performance optimization techniques for efficient solar energy utilization.

TECHNICAL SKILLS

Programming

C (Foundational) • HTML • CSS
JavaScript • Java (Basic)

Embedded & IoT

Arduino (Basic) • Sensor Interfacing
IoT & Embedded Systems (Learning)

Engineering Tools

MATLAB • SolidWorks
Mechanical Modeling

Research & Domain Knowledge

Wireless BMS • Solar Energy Systems
Renewable Energy
Electrical & Automation Fundamentals

PROFESSIONAL SKILLS

- Technical Research
- Problem Solving
- Team Collaboration
- Documentation
- Adaptability
- Effective Communication

RESEARCH, ACHIEVEMENTS & CERTIFICATIONS

- Qualified for Pre-Final Round – International Astronomy & Astrophysics Competition (IAAC)
- Research paper on Solar Cell Technology – performance optimization and efficiency analysis
- Ongoing research publication on Wireless BMS – faculty-guided initiative at KCT
- Selected for research activities at KCT; active contributor to engineering innovation initiatives
- Cloud Infrastructure 2025 Foundation Associate – Oracle University | 93%
- Arduino Fundamentals Certification
- MATLAB Onramp – MathWorks
- Technical Workshops & Hackathon Participation Certificates
